PROFILE

Motivated Computer Science student (BSc Informatics, USI; MSc at ETH Zurich) with hands-on experience in Python data pipelines on AWS, full-stack development (Java Spring Boot, Vue.js, React) and PostgreSQL. Reliable, fast learner and team player, shaped by large team projects and years of competitive football. Available for positions in software development, data, IT and related fields.

PROFESSIONAL EXPERIENCE

Data Engineering Intern *Sep 2025 – Dec 2025*
Brightside Capital, Lugano, Switzerland

- Built Python automation for the end-to-end import, field mapping and export of banking data from AWS Cloud into the company's internal database schema.
- Analysed, parsed and mapped heterogeneous banking datasets to a unified schema.
- Designed and ran validation checks to ensure consistency between actual and expected values, improving data reliability.
- Diagnosed and fixed pre-existing issues in the data-processing pipeline and contributed to ongoing development.

EDUCATION

MSc in Computer Science – Major in Data Management *Sep 2026 – Present*
ETH Zurich, Switzerland

BSc in Informatics *Sep 2023 – Jun 2026*
Università della Svizzera italiana (USI), Lugano, Switzerland

- **Thesis:** *From Raw Data to Pedagogical Insights: Designing a Static Analysis Dashboard for PyTamaro-Web*. Built an interactive dashboard applying static analysis to programming telemetry, helping instructors assess student progress and improve teaching.

Scientific High School (Liceo Scientifico Scienze Applicate), Liceo Paolo Giovio, Como, Italy *2013 – 2023*

SELECTED PROJECTS

Frantic: Pandora's Box – Digital Companion App *Live demo | GitHub*
React, TypeScript, Vite, Tailwind CSS, Vitest

- Designed and built a mobile-first, that works as digital scorekeeper and rules reference for the card game Frantic and its Pandora's Box expansion: automated round scoring, live leaderboard and a multilingual card encyclopedia (EN, DE, FR, IT).
- Implemented a custom game-state engine in TypeScript with persistent auto-save, JSON import/export, and an automated test suite (Vitest, React Testing Library); deployed on Netlify.

SEWorld – Educational Platform (team of 20) *USI*
Vue.js, Java Spring Boot, PostgreSQL

- Built features for AI-driven exercise evaluation, student performance statistics, and dynamic feedback and commenting across frontend and backend.

TECHNICAL SKILLS

Languages	Python, Java, JavaScript, SQL, C, C++, Bash
Data & Databases	PostgreSQL, schema design, MySQL-to-PostgreSQL migration, data parsing and automation
Backend	Java Spring Boot, REST API design
Frontend	Vue.js, React, TypeScript, Vite, HTML5, CSS3, Tailwind CSS, Bootstrap, Web Components
Tools & Cloud	AWS, Netlify, Docker, Git, GitHub, GitLab, Vitest, Jupyter Notebook, LaTeX

LANGUAGES & INTERESTS

Languages: Italian (native) • English (B2)
Interests: Former professional-level football player (teamwork, discipline, performance under pressure) • Motorbiking • Skiing • Film and TV (especially behind-the-scenes)
